

## ★ Customer Comments ★

★ “We purchased our second Model E-100 eight years after our first one. Our school system expanded the sports program and we needed a second unit at a separate facility. We like the field marker's ease of operation and maintenance. The lines are sharp and we get good coverage on the grass. The original paint striping equipment has held up extremely well with very little maintenance, an occasional replacement spray tip and Shurflo pump valve kit.”

Mike Tulty

Maintenance Sprvsr. -- Clarinda Community Schools  
-- Clarinda, IA

★ “Before purchasing our Tru Mark E-100 Field Marker, we investigated four other brands ranging in price from \$950 to \$3500. Our decision to purchase the E-100 was based on its ‘user friendly features’, it satisfied any environmental concerns, and it was good value for the money.”

Rick Hall

A.Y.S.O. Region 150 – Bishop, CA

★ “The Tru Mark E-100 is very simple to operate, very efficient, and very easy to use. Its light weight makes it easy to handle and easy to push. The Tru Mark is simple in design making it a low maintenance product.”

Darrell Carlson

Maintenance Sprvsr. – Fremont HS – Fremont, NE

★ “We are very impressed with the line quality of our Tru Mark E-100. It makes our AYSO field look like a professional field.”

Terry Williams

Director of Fields – AYSO Region 215 – Chula Vista, CA

★ “Painting our fields takes a lot less time with our Tru Mark field marker. Clean up is easy and quick compared to other machines I’ve used.”

Rob Carson

Birmingham Public Schools, Birmingham, MI

★ “I now line our football field in 2 hours including all boundary lines, yardage lines and 4 sets of hash marks. The E-100 with the Paint Boom is easy to use and does a good job. It is easier to maintain and operate than our previous CO2 system. Our football field is used by 5 different teams and is used sometimes 3 times a week.”

Norm Frady, Grounds Maintenance Chief  
Park and Recreation Dept., Norfolk, NE

★ “We have 8 soccer fields and line two city recreation fields for our annual Fremont Back to School Classic Soccer Tournament. Our all volunteer staff used to spend all day lining our fields during normal soccer league play. With the RS-500 we are now able to line all soccer fields in less than 4 hours including paint mixing. We are really pleased with the speed and coverage we get with the RS-500. The RS-500 two nozzle application provides coverage that will normally last for 2 weeks with irrigation and mowing activities.”

Kent Speicher

Fremont Soccer Club Board of Directors  
and Co-Tournament Director - Fremont, NE

★ “I would spend on the average of 35 hours using our old walk-behind sprayer to line our 30 field complex. Using our new RS-500 I’m able to line the same fields in 12 hours. We are using 50% less paint each week, where before we were applying 100 gallons of paint we are now only applying 50 gallons. It was so noticeable that the paint supplier called to find out why we using far less paint than before. We’re very pleased with the efficiency and performance of the RS-500.”

Randy Dvorak

Complex Manager, Cedar Rapids-Tuma Soccer  
Complex, Cedar Rapids, IA

★ “We have 6 football fields, 4 soccer fields and also line for cross country and do the shot put and discus rings for track. The RS-500, along with the Paint Mule trailer, saves us time in getting all our marking done, plus gives us better line quality and straighter lines than we were able to achieve before.”

Mark Nathan

Norfolk Public Schools – Norfolk, NE

★ “I just wanted to let you know that the letter stencils and the Titans logo were fantastic. The cuts on the centerfield logo looked very difficult to cut but were done masterfully! We spent a few hours yesterday (The last home game was played at another field as the goal post were not in yet.) painting and the results were much better than we had hoped! Thank you so much for your attention to detail, getting the stencils to me in time and the advice for the paint ratios!”

Regards, Wesley Moore,  
the NH Seacoast Titans, Dover, NH
